

1. Introduction  
2. Methodology  
3. Results  
4. Discussion  
5. Conclusion

Figure 1: A flowchart illustrating the methodology of the study.

The study was conducted in a laboratory setting.

The participants were recruited from a local university. They were informed of the purpose of the study and gave their informed consent. The study was approved by the ethics committee of the university.

The data were analyzed using statistical software. The results are presented in the following table.

Variable	Mean	Standard Deviation	Minimum	Maximum
Age	25.5	3.2	18	35
Gender	50%	0	0	100%
Education	15.2	1.5	12	18
