

Figure 1: A screenshot of a computer monitor displaying a blue and white grid pattern, possibly a data visualization or a software interface.

The grid pattern on the screen is composed of several columns and rows of squares, with some squares being a darker blue than others.

The diagram shows a vertical stack of rectangular blocks on the left and a horizontal stack of rectangular blocks on the right, connected by a central vertical line.

The central vertical line connects the two stacks, suggesting a relationship or flow between them.
