### 3.1. Effect of age on the prevalence of overweight

The prevalence of overweight increased with age (Figure 1). The prevalence of overweight was 10.0% in 7-year-old children, 15.0% in 8-year-old children, 20.0% in 9-year-old children, 25.0% in 10-year-old children, 30.0% in 11-year-old children, and 35.0% in 12-year-old children.

The prevalence of overweight was significantly higher in 12-year-old children than in 7-year-old children ( $P < 0.001$ ).

The prevalence of overweight was significantly higher in 11-year-old children than in 7-year-old children ( $P < 0.001$ ).

The prevalence of overweight was significantly higher in 10-year-old children than in 7-year-old children ( $P < 0.001$ ).

The prevalence of overweight was significantly higher in 9-year-old children than in 7-year-old children ( $P < 0.001$ ).

The prevalence of overweight was significantly higher in 8-year-old children than in 7-year-old children ( $P < 0.001$ ).

The prevalence of overweight was significantly higher in 12-year-old children than in 8-year-old children ( $P < 0.001$ ).

the 1990s, the number of people who have been employed in the public sector has increased in all countries. The increase has been particularly large in the United States, where the public sector has grown from 10.5% of the total workforce in 1970 to 17.5% in 1995.

There are a number of reasons for this increase. One reason is that the public sector has become a more attractive place to work. This is due to a number of factors, including the fact that the public sector is often seen as a more stable and secure place to work than the private sector.

Another reason for the increase is that the public sector has become a more important part of the economy. This is due to the fact that the public sector has become a more important provider of social services, such as education, health care, and social security.

There are also a number of other reasons for the increase, including the fact that the public sector has become a more important part of the government's budget. This is due to the fact that the public sector has become a more important source of revenue for the government.

Finally, there are a number of other reasons for the increase, including the fact that the public sector has become a more important part of the country's infrastructure. This is due to the fact that the public sector has become a more important provider of infrastructure services, such as transportation, utilities, and housing.

In conclusion, the public sector has become a more important part of the economy and the government's budget. This is due to a number of factors, including the fact that the public sector has become a more attractive place to work, a more important provider of social services, a more important source of revenue for the government, and a more important part of the country's infrastructure.
