

the *Journal of the Royal Society of Medicine* (1910) and the *Journal of the Royal Society of Medicine* (1911). In 1910, the *Journal of the Royal Society of Medicine* published a special issue on the "Etiology of Tuberculosis," which was edited by the British Association for the Study of Tuberculosis. This issue contained several articles, including one by the author, which discussed the role of the bacillus in the causation of the disease. The *Journal of the Royal Society of Medicine* (1911) also published a special issue on the "Etiology of Tuberculosis," which was edited by the British Association for the Study of Tuberculosis. This issue contained several articles, including one by the author, which discussed the role of the bacillus in the causation of the disease.

The *Journal of the Royal Society of Medicine* (1910) and the *Journal of the Royal Society of Medicine* (1911) were both published by the Royal Society of Medicine, which was founded in 1858. The Royal Society of Medicine is a learned society of medical professionals in the United Kingdom. It is the largest of the four Royal Societies, and its members include doctors, nurses, dentists, and other health professionals. The Royal Society of Medicine is committed to the advancement of medical knowledge and the improvement of patient care.
