

The diagram illustrates the relationship between two sets, A and B. Set A is represented by a large rectangle, and set B is represented by a smaller rectangle contained within A. The large rectangle is partitioned into four quadrants by a vertical and a horizontal line. The smaller rectangle is located in the top-right quadrant of the larger rectangle.

This configuration suggests that set B is a subset of set A, and its position within the top-right quadrant of A indicates a specific relationship or property relative to the other quadrants.
