

Figure 1

Figure 1 shows a schematic diagram of a rectangular structure with a central rectangular inset. The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.

The inset is shaded with a blue-to-purple gradient. The main structure has a light blue gradient. The inset is positioned in the upper right quadrant of the main structure.
