

The diagram illustrates a process or structure. The outer rectangle represents the overall system, and the inner rectangle represents a specific component or sub-system. The grid of colored squares within the inner rectangle likely represents a data set or a specific configuration of elements.

This section provides further details about the components and their interactions. It describes how the elements within the grid are organized and how they relate to the overall system structure.

This part of the document discusses the implications of the findings and how they apply to the broader context of the study.

This section outlines the conclusions drawn from the analysis and provides recommendations for future research or practical applications.

This final section summarizes the key points of the document and reiterates the main findings and conclusions.
