

# REPORT

The following table shows the results of the experiment conducted on the 15th of October 2023. The data was collected from the measurements of the system's performance under various conditions. The results indicate that the system's performance is significantly affected by the input parameters, with the most notable changes observed in the output values.

The data shows that the system's performance is highly sensitive to the input parameters, and the results are consistent across the different trials. The overall trend suggests that the system's performance is optimized when the input parameters are set to the values indicated in the table.

The results of the experiment are summarized in the table below, which shows the measured values for each parameter. The data indicates that the system's performance is significantly affected by the input parameters, with the most notable changes observed in the output values. The results are consistent across the different trials, and the overall trend suggests that the system's performance is optimized when the input parameters are set to the values indicated in the table.
