

QUESTION

The diagram illustrates a process flow or data structure. It shows a rectangular box on the left with three horizontal lines extending from its right side. These lines connect to a larger rectangular box on the right. The larger box contains a grid of 3 rows and 3 columns of smaller squares. The top row of the grid has three squares, the middle row has three squares, and the bottom row has three squares. The entire diagram is enclosed in a larger rectangular frame.

ANSWER

The diagram illustrates a process flow or data structure. It shows a rectangular box on the left with three horizontal lines extending from its right side. These lines connect to a larger rectangular box on the right. The larger box contains a grid of 3 rows and 3 columns of smaller squares. The top row of the grid has three squares, the middle row has three squares, and the bottom row has three squares. The entire diagram is enclosed in a larger rectangular frame.
