

The diagram illustrates the structural components of the assembly. The central shaft is supported by a base, and the horizontal arm is connected to a rectangular component. The blue shaded area represents a specific material or component. The horizontal lines below the arm indicate structural supports or components.

The assembly is designed to withstand various loads and stresses. The central shaft is supported by a base, and the horizontal arm is connected to a rectangular component. The blue shaded area represents a specific material or component. The horizontal lines below the arm indicate structural supports or components.
