the 1990s, the number of people in the labour force has increased by 1.5 million.

As a result of the increase in the labour force, the unemployment rate has risen from 10.5% in 1990 to 12.5% in 1995. The increase in the unemployment rate is due to the fact that the number of people in the labour force has increased faster than the number of jobs available.

The increase in the unemployment rate has led to a number of social and economic problems. These include an increase in poverty, a decrease in living standards, and a decrease in the quality of life.

The government has taken a number of steps to address the unemployment problem. These include increasing the minimum wage, providing job training, and creating new jobs.

Despite these efforts, the unemployment rate has continued to rise. This is due to a number of factors, including a slow economy, a decrease in government spending, and a decrease in the number of jobs available.

The unemployment rate is expected to continue to rise in the coming years. This is due to a number of factors, including a slow economy, a decrease in government spending, and a decrease in the number of jobs available.

The unemployment rate is a major concern for the public. It is a sign of economic trouble and a decrease in living standards. The government must take steps to address the unemployment problem.

The unemployment rate is a complex issue. It is caused by a number of factors, including a slow economy, a decrease in government spending, and a decrease in the number of jobs available.

The unemployment rate is a major concern for the public. It is a sign of economic trouble and a decrease in living standards. The government must take steps to address the unemployment problem.
