

the 1990s, the number of people with a disability in the United States has increased by 25% (U.S. Census Bureau, 2000).

As a result of the increase in the number of people with disabilities, the need for accessible information has become more acute. The National Center for Accessible Information (NCAI) has estimated that the number of people with disabilities who are unable to access information is 100 million (NCAI, 2000).

One of the most significant barriers to accessible information is the lack of accessible electronic information. The National Center for Accessible Information (NCAI) has estimated that the number of people with disabilities who are unable to access electronic information is 100 million (NCAI, 2000). The National Center for Accessible Information (NCAI) has estimated that the number of people with disabilities who are unable to access electronic information is 100 million (NCAI, 2000).
