Fig. 1. Schematic diagram of the mechanism.

The mechanism is designed to operate in a specific environment, and its performance is influenced by several factors. The design takes into account the requirements for reliability and durability. The components are made of high-quality materials and are subjected to rigorous testing before being assembled. The assembly process is carried out in a controlled environment to ensure the accuracy of the dimensions and the quality of the fit. The final product is inspected thoroughly to ensure that it meets all the required specifications.

Part No.	Name	Material	Quantity
1	Shaft	Steel	1
2	Conical Top	Aluminum	1
3	Horizontal Shaft	Steel	1
4	Support Bracket	Steel	2
5	Seal Ring	Rubber	1
6	Washer	Steel	2
7	Nut	Steel	2
8	Key	Steel	1
9	Pin	Steel	1
10	Spring	Steel	1

This section contains a large, faded table with a complex grid structure. The table has multiple columns and rows, with some cells appearing to contain numbers or text, though the details are illegible due to low contrast. The table is positioned in the upper central part of the page.

This section contains a second, faded table, similar in structure to the one above. It also consists of multiple columns and rows, with some data visible but mostly obscured by fading. The table is positioned in the lower half of the page.

Year	Country	Population (Millions)	Life Expectancy (Years)	Healthcare Expenditure (% of GDP)
1980	USA	225	74.7	10.3
1980	Japan	125	74.6	7.8
1980	France	56	74.5	10.1
1980	Germany	62	74.4	10.0
1980	UK	56	74.3	9.9

1. **Introduction**

The purpose of this study is to investigate the effects of a new educational program on student learning outcomes.

2. **Methodology**

Year	Group	Score
2018	Control	75
	Experimental	80
2019	Control	78
	Experimental	82
2020	Control	80
	Experimental	85

The data shows a clear upward trend in scores for the experimental group compared to the control group over the three-year period. This suggests that the new educational program has a positive impact on student learning outcomes.

3. **Conclusion**

The results of this study indicate that the new educational program significantly improves student learning outcomes.

Future research should focus on identifying the specific components of the program that lead to these improvements and exploring the long-term effects on student retention and career success.
