

The diagram illustrates the relationship between the four quadrants of the box. The top-left and bottom-left quadrants are smaller, while the top-right and bottom-right quadrants are larger. The grid pattern is consistent across all quadrants.

The diagram shows a rectangular box with a grid pattern inside. The box is divided into four quadrants by a vertical and a horizontal line. The top-left quadrant contains a small square with a dot in the center. The top-right quadrant contains a larger square with a dot in the center. The bottom-left quadrant contains a small square with a dot in the center. The bottom-right quadrant contains a larger square with a dot in the center. The grid pattern is consistent across all quadrants.
