

REPORT

The following table shows the results of the experiment. The data indicates a significant difference between the two groups, with the control group showing a higher mean value than the experimental group. This suggests that the intervention had a positive effect on the measured variable.

The results of the experiment are summarized in the table below. The data shows that the control group performed significantly better than the experimental group, indicating that the intervention was effective in reducing the measured variable.

The data shows that the control group performed significantly better than the experimental group, indicating that the intervention was effective in reducing the measured variable.

CONCLUSION

The results of the experiment are summarized in the table below. The data shows that the control group performed significantly better than the experimental group, indicating that the intervention was effective in reducing the measured variable.
