Date	Description
1998-01-01	Initial setup and data collection.
1998-01-15	First major data entry session.
1998-02-01	Review of data quality and accuracy.
1998-02-15	Continuation of data entry.
1998-03-01	Final data entry and verification.
1998-03-15	Data analysis and reporting.
1998-03-31	Project completion and final review.

The data collected during this project shows a significant increase in the number of cases reported in the first half of 1998, followed by a decline in the second half. This trend is consistent with the seasonal patterns observed in previous years. The overall incidence rate for the period was 1.2 cases per 100,000 population.

The following table provides a summary of the key findings from the data analysis:

Category	Value
Total Cases	120
Male	65
Female	55
Age Group (0-14)	30
Age Group (15-44)	45
Age Group (45-64)	25
Age Group (65+)	20
